

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

years, until January 1, 1920, an assistant director; Dr. Francis Clifford Phillips (d. Feb. 16), emeritus professor of chemistry at the University of Pittsburgh; and Dr. Leonard Merritt Liddle (d. Feb. 21), since 1913 an industrial fellow.

WHEREAS, Dr. David Shepard Pratt, recently an assistant director of the Mellon Institute, was intimately associated with the work of many of us and was our true friend and adviser, and

WHEREAS, Dr. Pratt has faithfully employed his talents in our behalf and has made his breadth of knowledge, his fertile imagination and his keenness of perception of great practical assistance to us both by active cooperation in the laboratory and by helpful suggestion; therefore be it

Resolved, That we, the members of the Robert Kennedy Duncan Club, take this opportunity of expressing our sense of sorrow at his untimely death.

Be it further resolved, That we deplore the loss of one who was utilizing his many talents for the good of American industry.

WHEREAS, Dr. Francis Clifford Phillips, our distinguished colleague, was loved by us because of his kindly and genial ways, his unselfish consideration of others and his humor, and

WHEREAS, Dr. Phillips has brought fame both to himself and to the University of Pittsburgh, by his scholarship, his ability as a teacher and his remarkable contributions to the advancement of science, and

WHEREAS, Dr. Phillips has been an inspiration to all who knew him by reason of his personal qualities and his devotion to science. Therefore be it

Resolved, That we, the members of the R. K. D. Club, express our sadness at the close of his beautiful life of service.

Be it further resolved, That we believe that American science has lost a most sincere student and investigator.

WHEREAS, Dr. Leonard Merritt Liddle has been a friend and associate among us for the past eight years and has endeared himself to each of us by his spirit of helpfulness, his kindness and his good fellowship, and

WHEREAS, Dr. Liddle has stood out as leader in the Institute in scientific ability, in untiring energy, in devotion to his chosen profession and in loyalty to the best ideals of the Mellon Institute. Therefore, be it

Resolved, That, we, the members of the R. K. D. Club, wish to express our profound sorrow at the loss of our comrade and sincere friend, who has

been cut down thus early in his useful career. We also deeply regret the removal of one who was devoting his life to the betterment of American industry by the application of science to the solution of its problems.

MEMORIAL TO SIR WILLIAM OSLER¹

A PUBLIC meeting was held in the University Museum, Oxford, on March 6, to initiate a memorial to the late Sir William Osler, Bart., Regius professor of medicine in the university for the past fifteen years. The vice-chancellor presided. Sir Clifford Allbutt, who introduced the proposal, paid a feeling and eloquent tribute to the memory of Sir William Osler, to the wide range of his intellect, and to the singular charm of his character. He referred to his international reputation and to the binding influence he had on the medical profession in many lands, to his love of peace and goodwill, and to the extraordinary power he exerted in diffusing without diluting friendship. The president of Magdalen, Sir Herbert Warren, mentioned the many-sidedness of Osler's interests and activities, the breadth and accuracy of his scholarship, and the clear and steady optimism with which he regarded life and its progress in all ages. Sir William Church, who introduced the specific proposal that the memorial should take the form of an Osler Institute of General Pathology and Preventive Medicine, stated that such a memorial as that suggested would be a singularly appropriate tribute to the outlook and ideals that Osler had kept before him in his life-work. Professor Thomson emphasized the need of new laboratory accommodation in Oxford for teaching and research. The dean of Christ Church and Sir Archibald Garrod also spoke. It was announced that the honorable secretary, Professor Gunn, had received expressions of sympathy with the proposed memorial from a large number of people representing many interests, and that a collateral committee had been formed in America to aid in raising the memorial.
